

COMP 8967 Summer 2024 Final Exam Question

Please check the posted Excel file, which shows each GA and the teams he/she supervised. For each team, you will see a Team No. and each team member has a numerical designation, such as Team Member1, Team Member2, Team Member3,

Depending on this numerical designation, you have been assigned ONE specific tool from the textbook we discussed in this class. Using the tool corresponding to your numerical designation, answer the following questions **specifically in the context of your project:**

1. Problem/Situation/Circumstance this tool addresses:

- a) What is the purpose of this tool?
- b) Do you see this tool can be used in your project? If yes, please elaborate. If no, why?

Whether your answer is yes or no, please provide specific examples based on your team project experience to justify your answer.

2. Implementation and Expected Impact:

- a) How would you implement this tool in the context of your project? Provide specific or hypothetical examples related to your project.
- b) How will this tool affect your project's success? Discuss the specific benefits or improvements you expect from using this tool related to your project.

3. Challenges in Application:

- a) What challenges might you encounter when applying this tool to your project?
- b) Discuss how you would address these challenges to ensure the tool's effective implementation.

Important Note: Quality is more important than quantity. Focus on providing clear, concise, and relevant answers directly addressing the question. Long, off-topic responses will not earn extra marks. Even shorter, to-the-point answers demonstrating a deep understanding of the tool and its application will be highly valued. **Again, answer the questions in the context of your project.**

In your answer, please first write down

<u>your GA's name,</u>	
<u>your team No.,</u>	
<u>your numerical designation as seen in the Excel file,</u>	
<u>The name of the tool you are assigned to</u>	
<u>your project title</u>	
<u>your name</u>	
<u>your student ID.</u>
